Intro Prog & Problem Solving

Peter Gatsby

Instructor

CALIFORNIA STATE UNIVERSITY, LONG BEACH  
STUDENT PERCEPTIONS OF TEACHING (SPOT) REPORT

34  
Enrollment

Face to Face - On Campus  
Course modality

Spring 2023

## Student Comments

### What contributed most to your learning in this course?

- Easily assessable office hours and helpful coding tips
- Peter Gatsby
- Peter will always help you one on one that the most contribution I can say.
- In lab, working with my group helped me understand the material. And Peter did a good job going over concepts on the board and explaining the code to us, so it was less intimidating.
- The support from the TA helped a lot.
- Student like us
- The active learning activities
- Peter being so available to help and instruct were a major contribution in my learning.
- Peter was a great resource for our labs. He'd always be ready to handle any questions we had and would always show us how to start our projects and labs.
  
- Great at teaching and explaining concepts covered in class.
- Showing examples in class and explaining the concepts
- Explaining code on the projector.
- Examples shown
- Going to Lab with Peter helped me out more than the lectures did with understanding certain concepts. Peter the GOAT fr, all those strongly agrees are towards Peter not the professor. It was helpful when you would help us with the flowcharts for the projects!

### Did anything interfere with your learning in this course? If so, explain.

- No
- No
- Nothing interfered with learning just the vase course work to understand such a topic
- Sometimes the lab instructions were unclear, or the zybooks were a little too complicated for the things we were learning at the time.
- No
- Nothing
- nothing
- Nothing
- N/A
- NA
- N/A
- Nothing

- My job
- No, not really. Mainly the lecture since sometimes we would have to use stuff from lecture in the lab, but the stuff would be poorly explained in lecture so lab could take a bit more time, but Peter was there to help so we were chilling.

**What suggestions or recommendations do you think would help your instructor prepare to teach this course again?**

- No
- Nothing
- Nothing, its Perfect
- I wish zybooks had an option of giving us hints when we are stuck on a coding problem.
- The TA is doing a good job already.
- Nothing
- More examples of topics
- Stay just like that. That's my recommendation. you're a 10/10 TA
- N/A
- It's perfect as it is.
- N/A perfect!
- Everything was good
- Teaching more concepts in class only relying on backwards teaching a bit not as much as she had previously
- I have none.
